

TABLE OF CONTENTS

Vol. 62 No. 1 May 1995

STEFANO CASOTTO / The Gravitational Perturbation Spectrum in Linear Satellite Theory	1-22
F. VARADI, C. M. DE LA BARRE, W. M. KAULA, and M. GHIL / Singularly Weighted Symplectic Forms and Applications to Asteroid Motion	23-41
FRANCESCO FASSÒ / Hamiltonian Perturbation Theory on a Manifold	43-69
N. M. HARWOOD and G. G. SWINERD / Long-Periodic and Secular Perturbations to the Orbit of a Spherical Satellite Due to Direct Solar Radiation Pressure	71-80
N. M. HARWOOD and G. G. SWINERD / Long-Periodic and Secular Perturbations to the Orbits of Explorer 19 and Lageos Due to Direct Solar Radiation Pressure	81-92
CARLOS OSÁCAR, JESÚS PALACIÁN, and MANUEL PALACIOS / Numerical Evaluation of the Dilogarithm of Complex Argument	93-98
JI-LIN ZHOU and YI-SUI SUN / Hamiltonian Description of Streamline Formalism with Application in Planetary Rings	99-109

Vol. 62 No. 2 June 1995

JAMES E. HOWARD / Unified Hamiltonian Stability Theory	111-116
M. K. CHENG, B. D. TAPLEY and S. CASOTTO / A New Method for Computing the Spectrum of the Gravitational Perturbations on Satellite Orbits	117-143
T. GALLARDO and S. FERRAZ-MELLO / The High-Eccentricity Libration Theory Revisited	145-165
MARTÍN LARA, ANDRÉ DEPRIT and ANTONIO ELIPE / Numerical Continuation of Families of Frozen Orbits in the Zonal Problem of Artificial Satellite Theory	167-181
DMITRY V. BRUMBERG and VICTOR A. BRUMBERG / Derivative of Kaula's Inclination Function	183-189
A. ELIPE, J. HIETARINTA and S. TOMPAIDIS / Comment on a Paper by S. Kasperczuk, <i>Celest. Mech</i> 58: 387-391 (1994)	191-192

Vol. 62 No. 3 July 1995

JACQUES LASKAR and PHILIPPE ROBUTEL / Stability of the Planetary Three-Body Problem. I. Expansion of the Planetary Hamiltonian	193-217
PHILIPPE ROBUTEL / Stability of the Planetary Three-Body Problem. II. KAM Theory and Existence of Quasiperiodic Motions	219-261
MICHAEL E. HOUGH / Integral Surfaces with Space-Time Coordinates, in the Gravitational Field of a Rotating System	263-287

Vol. 62 No. 4 1995

IVAN I. SHEVCHENKO and ANDREJ G. SOKOLSKY / Hyperboloidal Precession of a Dynamically Symmetric Satellite. Construction of Normal Forms of the Hamiltonian	289-304
SANDRO DA SILVA FERNANDES / Some Expansions of the Elliptic Motion to High Eccentricities	305-321
VLADIMIR N. SHINKIN / The Integrable Cases of the General Spatial Three-Body Problem at Third-Order Resonance	323-334
KIYOTAKA TANIKAWA, HIROAKI UMEHARA, and HIROSHI ABE / A Search for Collision Orbits in the Free-Fall Three-Body Problem. I. Numerical Procedure	335-362
P. DEFRAIGNE, V. DEHANT, and P. PÂQUET / Link between the Retrograde-Prograde Nutations and Nutations in Obliquity and Longitude	363-376
H. PIETILÄ, P. HEINÄMÄKI, S. MIKKOLA, and M. J. VALTONEN / Anisotropic Gravitational Radiation in the Problems of Three and Four Black Holes	377-394
A. SAN MIGUEL / Hannay Angels for Relativistic Polar Orbits Around an Oblate Spheroid	395-406
Instructions to Authors	407-408
Volume Contents	409-410
